ACADEMICS

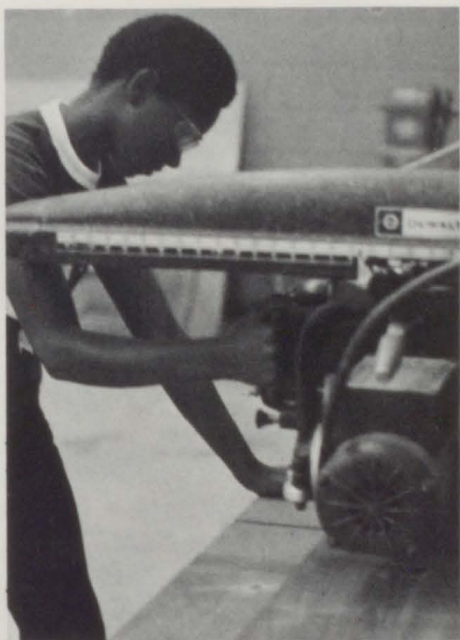

VOCATIONAL EDUCATION

BUSINESS EDUCATION

In Business Education, students learn the importance of business activities in the world around them. Through the use of simulated working conditions they become familiar with different job requirements. Several work programs (VOT/IOP) are available in which students may receive school credit for their off-campus jobs. Students are also encouraged to participate in the Future Business Leaders of America (FBLA) which is sponsored by the department.

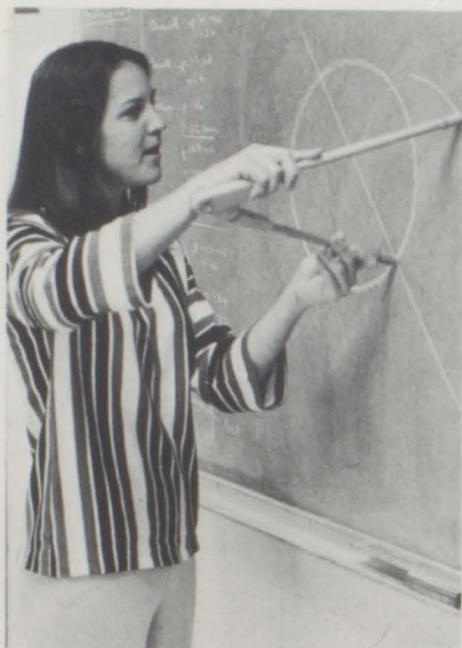

CONSTRUCTION — METALS — AGRICULTURE

Vocational programs at the High School are primarily designed to provide students with exploratory training experiences in vocational electives. These electives provide job skills for those who intend to enter directly into employment or plan to continue their training at the post-secondary level after graduation.

MATH

Awards — given each year to a student (usually a senior) with the highest academic average for 4 years of math.

Activities — our students participate in the Gordon Jr. math contest and in the Middle Ga. math contest sponsored by Macon Jr. College. Gordon Jr. Contest Winners Pictured Above — Martha McAfee, Todd Fredrick, Linda Lowery, and Tim Smith.

SCIENCE

Science Students are encouraged to become proficient in the use of the scientific method, and its resultant critical thinking. Students should learn more than a mere "History" of science and should be able to apply scientific principles to their daily life.

MUSIC

Music at Crawford County High is an integral part of the daily program. This means that music is recognized as each child's heritage and as part of the "here and now" of day to day living. Music is designed for the students enjoyment, as well as a learning process that is correlated with school and community activities, such as Christmas programs, literary events, and one act.

ART

The year 1979-80 has been a turning point for many Crawford art students. The art projects that we attempted will serve as a basic for the careers we will pursue after graduation. This year we experimented and improved in many areas. Among these were, silk screening, air brush painting, and background scenery. The projects have been educational and lots of fun.

ENGLISH

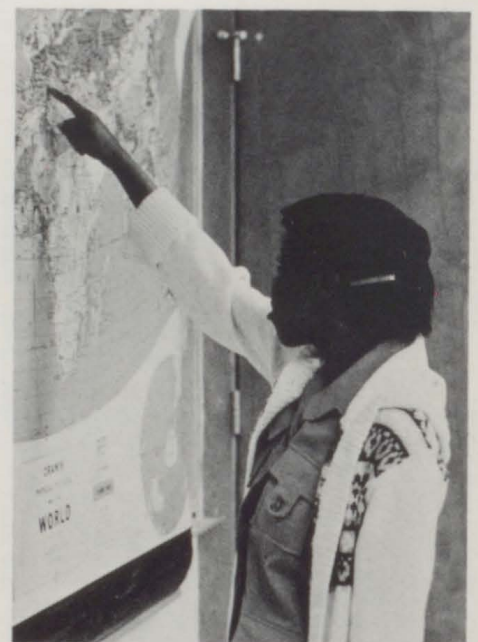

The English Department attempts to help students to become proficient in the language arts. Students who show promise in writing and speaking are encouraged to participate in the annual literary events.

SOCIAL STUDIES

In today's fast world a rather complete knowledge of social studies is needed for an average American citizen and government student to enable him to understand the problems of the world. A well-rounded social studies program provides each student with the essential ability to understand the functioning of American government and the heritage of our history. It is generally recognized that a student that has had the full compliment of the social studies is well prepared to exercise his rights and privileges as a citizen and to cope with the problems confronting him in a fast moving world. The social studies program at CCCHS will enable a student to achieve this preparedness.

HOME ECONOMICS

Home Economics offers study in 4 areas — housing, foods and nutrition, clothing and textiles, child and family development. Modern facilities include microwave range and many electrical appliances — sewing machines, a vital part of clothing education — Relaxed atmosphere for learning and enjoying Home Economics — Career and consumer education in each area.

PHYSICAL EDUCATION

Physical Education is for the entire body, not only does it develop the body, but the mind as well. The skills that are learned during your High School Education days will carry throughout life. There are sports taught in our P. E. Department which are considered life long sports, examples ... Tennis, and other recreational games.

FAMOUS QUOTES

We are the class of '80
Our year was really great.
We will remember that time,
We were to graduate.
Some thought it would be easy,
Some knew it would be tough,
Some made "A"'s and some made "C"'s,
And for others the "road" was rough.

Do you know why she flunked Driver's Ed.? ...
Because she automatically got in the back seat.

History Student: I know that I have missed alot of days, but the grade of 64 on my progress report means I still have a chance to pass.
Mr. Irby: You've missed so many days that what you don't know is that these are report cards!

Student: Tell me what you think of my composition.
Teacher: Teachers are not supposed to use that type of language!

Boys talking during class change: Who was that girl that just walked by?
... I don't know, I wasn't looking at her face!

Student: What happended at the football game last night?
Another Student: I don't know, when I woke up everyone was gone!

First Student: Have you seen Coach Adams write on the blackboard?
Second Student: Yes, with a step ladder!

Mr. Johnson to an Annual Staffer: What did I just tell you to do?
Annual Staff Member: You tell me and we'll both know!

Football Coach to player during practice: I told you to "tackle" him, not to "tickle" him!!!

Cheerleaders Talking: Have you checked your goose today, to see that it's not loose today?

Student to teacher before final exams;; What score will I need to make on my final to pass this class? Teacher back to Student ... As best I can figure you will need to make a 14,793.

Student's talking ... How did you do on that test last period? Answer: Was that what that was?

Students in lunchroom ... How much will you pay me if I eat that?
Answer ... If you live I'll pay you \$1.00.

Junior after taking the S.A.T. ...
That wasn't so bad!
Another Junior ... What do you mean, I've never seen a harder test!
First Junior ... not for me, I kept my eyes closed

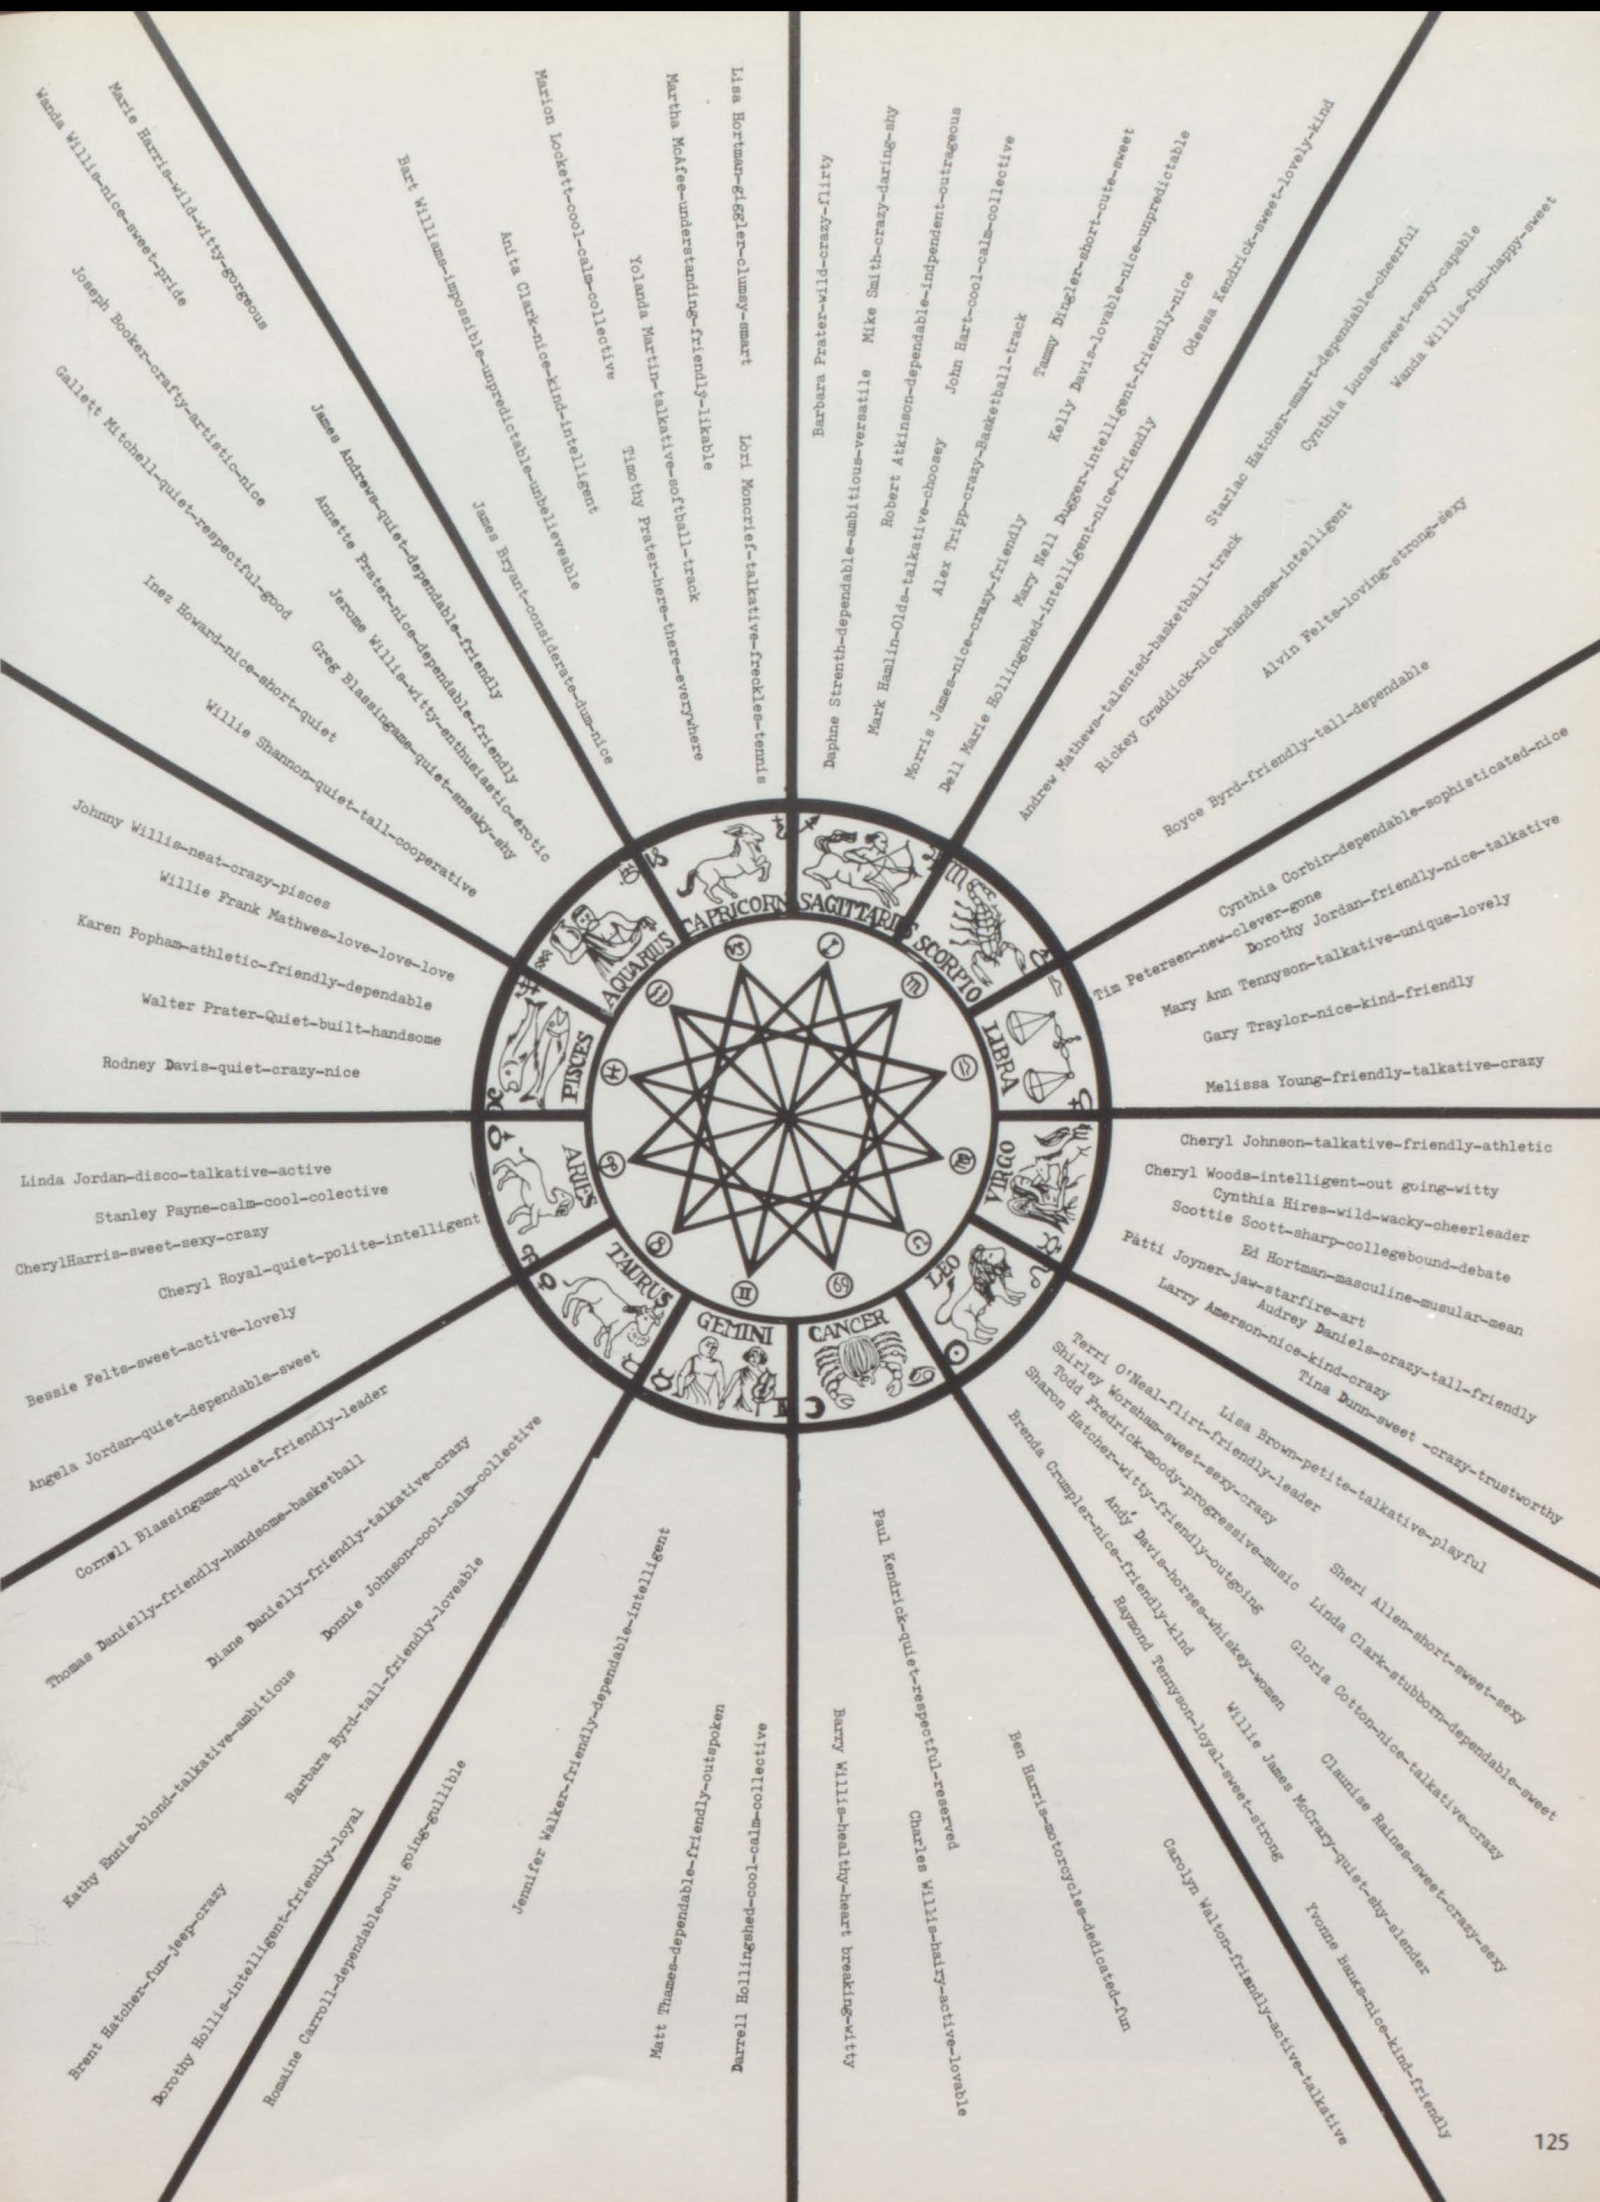

Football player talking ... coach Adams is really a shining example to his football team.
Second student ... That is because he and his hair had a falling out.

First student ... Which lunch group does Mr. Bassett eat with?
Second student ... First, second, and Third!!

Coach Adams after being asked why he is sometimes called "Papa Bald Eagle" ... I haven't the hairiest idea!

Student studying Chemistry ... Mr. Tea-gue, Is it true that R2D2 C3PO = Scrap Metal?

END
CONSTRUCTION

Another year has ended; our trip has come to an end. The road has been rough at time, but our encounters have made the journey worthwhile. All the many happenings are still so fresh in our minds, memories that will last forever. We must now begin to think of new horizons. Our futures seems so full of promise. We now leave one bus to soon board another, for we still have so far to go. May our journeys continue to be rewarding; may our flat tires be few and far between.
